# **config-sesame Documentation**

***Release 0.1.0***

**1**  
**1 Group**

2016-04-21

<b>1</b>	<b>Installing</b>	<b>3</b>
<b>2</b>	<b>Contributing</b>	<b>5</b>
<b>3</b>	<b>Documentation Contents</b>	<b>7</b>
3.1	Using Config Sesame . . . . .	7
3.2	Complete API Reference . . . . .	7
<b>4</b>	<b>References</b>	<b>9</b>
4.1	Tools . . . . .	9
4.2	Packages . . . . .	9
<b>5</b>	<b>Indices and Tables</b>	<b>11</b>

A tool to look up secrets from a vault based on existing shareable configuration.

---

## Installing

---

*Config Sesame* can be installed from PyPI via `pip install config-sesame` as usual, see [releases](#) on GitHub for an overview of available versions – the project uses [semantic versioning](#) and follows [PEP 440](#) conventions.

To get a bleeding-edge version from source, use these commands:

```
repo="jhermann/config-sesame"
pip install -r "https://raw.githubusercontent.com/$repo/master/requirements.txt"
pip install -UI -e "git+https://github.com/$repo.git#egg=${repo}#*/"
```

See the following section on how to create a full development environment.

To add bash completion, read the [Click docs](#) about it, or just follow these instructions:

```
cmdname=config-sesame
mkdir -p ~/.bash_completion.d
( export _$(tr a-z- A-Z_ <<<"$cmdname")_COMPLETE=source ; \
  $cmdname >~/.bash_completion.d/$cmdname.sh )
grep /.bash_completion.d/$cmdname.sh ~/.bash_completion >/dev/null \
  || echo >>~/.bash_completion ". ~/.bash_completion.d/$cmdname.sh"
. "/etc/bash_completion"
```

---

## Contributing

---

To create a working directory for this project, call these commands:

```
git clone "https://github.com/landl/config-sesame.git"
cd "config-sesame"
. .env --yes --develop
invoke build --docs test check
```

Contributing to this project is easy, and reporting an issue or adding to the documentation also improves things for every user. You don't need to be a developer to contribute. See `CONTRIBUTING` for more.

---

## Documentation Contents

---

### 3.1 Using Config Sesame

TODO

### 3.2 Complete API Reference

The following is a complete API reference generated from source.

---

## References

---

### 4.1 Tools

- Cookiecutter
- PyInvoke
- pytest
- tox
- Pylint
- twine
- bpython
- yolk3k

### 4.2 Packages

- Rituals
- Click

---

## Indices and Tables

---

- `genindex`
- `modindex`
- `search`
